# DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?
Removing the event listener and making the code(bookPreview) a function instead

_____

2. What parts of encapsulating your logic were hard?
Putting parts of the code in different files and exporting .
Using getters and setters , I was not able to use it in this code.

_____

3. Is abstracting the book preview a good or bad idea? Why?

Abstraction is good but in my opinion there wasn't much to change from what is was before

_____
